

# SURGICAL GLOVE SOLUTIONS

DEVELOPED, PRODUCED & PACKAGED IN EUROPE

# WHY SURGEONS TRUST SEMPERMED

Listening to healthcare professionals and observing them at work, we understand which innovations make a real difference in the operating room. We continuously push for new products that empower and protect surgical staff, care for even the most sensitive skin, and are manufactured in a more sustainable manner.

## DOUBLE PROTECTION

Sempermed surgical gloves are double-certified, in accordance with Medical Device Directive 93/42/EEC as well as Personal Protective Equipment Regulation (EU) 2016/425, to ensure your safety. Thanks to an optimized wall thickness, our gloves offer superior tactile sensitivity without making any concessions when it comes to your protection.

## SAFE FOR SENSITIVE SKIN

We offer solutions that protect your skin from common allergies. Synthetic materials which are free from allergenic latex proteins, skin-friendly manufacturing methods like our patented UV technology, and our specially developed washing and finishing process significantly reduce the risk of skin allergies.

## QUICK AND EASY TO DON **quickdon™**

Our surgical gloves possess excellent donning properties thanks to the specially developed Quick Don™ technology. The powder free synthetic inner coating reduces friction resistance, making our easy-to-don surgical gloves ideal for double-donning and intraoperative glove changes. Intraoperative glove changes may be recommended based on the procedure's nature and criticality, or approximately every hour.<sup>1)</sup>

## A COMPREHENSIVE PORTFOLIO

Surgeons and OR personnel encounter highly sensitive or high-risk procedures in their daily work. Our extensive portfolio, containing features like a micro-rough outer surface or an optimized wall thickness, offer solutions that empower and protect surgical staff and patients.

## FULLY ANATOMICAL SHAPE

With a design based on a natural, relaxed hand posture featuring a slightly wider back of the hand, our gloves allow for superior mobility and ensure that hands experience significantly less fatigue, especially during long procedures.

## MADE IN AUSTRIA SINCE 1920

We develop and produce surgical gloves in Austria. As a globally operating company, we are committed to the International Labor Organisation's standards, are an amfori Business Social Compliance Initiative member, and are always on the lookout for more sustainable solutions.

<sup>1)</sup> Depending on the nature and criticality of the procedure, intraoperative glove changes may be recommended based on the surgeon's assessment or other requirements, or approximately every hour.

**IMPORTANT NOTE:** The latest product information is available at [www.semparmed.com](http://www.semparmed.com) under the «Products» tab. Failure to observe this information, in particular with regard to (chemical) resistance, frequency of use and tolerability of the gloves, can result in personal injury and/or material damage. **HARPS Investment Asia Pte. Ltd. is not liable for incorrect use of the gloves nor will HARPS Investment Asia Pte. Ltd. be liable for improper storage and handling. In case of damage or unusual signs of wear and tear, gloves shall not be used.** In case of any doubt, expert advice should be sought before use. The information and classification is up to date as of the date of publication. Technical details are average values from production and may vary in individual cases. This disclaimer is subject to mistakes, printing errors and amendments. **CAUTION: Natural latex can cause allergic reactions, including anaphylactic shock. HARPS Investment Asia Pte. Ltd. bears no liability for allergic reactions.** ©Copyright 2024 HARPS
